

IMMUNOVISION

Extracts for Autoimmune Testing

Product Name: La/SS-B Antigen, Rabbit Thymus Origin

Activity: This product reacts with La/SS-B antisera in immunodiffusion. No reaction is observed with antisera to nRNP, Ro/SS-A, Sm, Scl-70, or Jo-1 in immunodiffusion. The activity of this product will vary with assay conditions. This antigen has been purified from rabbit thymus by a combination of protein fractionation and column chromatography. Most contaminating antigens have been removed by immunoabsorbent methodology.

Reconstitution: Reconstitute with 1 ml distilled water (Some assay systems may require more concentrated or more diluted extract.) Some precipitate may occur but will not affect product performance. Do not store diluted antigen. Repeated thawing will result in loss of activity. Storage: After reconstituting, aliquot and store frozen at -20°C.

Code	Amount	Price
SSB-1001	10 mg	\$180.00

Physical State: Lyophilized Powder
Buffer: 0.01M Phosphate, 0.13M NaCl, 0.02% Azide
