

IMMUNOVISION

HAMA and Blocking Reagents

Product Name: Myeloma Proteins

Description: **ImmunoVision** maintains a selection of myeloma proteins in ascites produced from BALB/c mice at our IACUC monitored facility. Ascites fluid is collected from mice with subcutaneous plasmacytomas. The fluid is clarified by centrifugation. Each lot of ascites fluid is stored frozen in aliquots of 5 ml. The fluid is shipped overnight frozen on dry ice. **ImmunoVision** has the ability to produce ascites fluid in lots up to 2L in size and purify the antibody using **your hybridoma**. Please contact our [experienced staff](mailto:cusserv@immunovision.com) regarding your specific purification needs.

Code	Description	Quantity	Price
RPC20-5ml		5 ml	\$60.00
	Description:	Mouse Lambda, nonspecific, ascites fluid	
RPC5-5ml		5 ml	\$60.00
	Description:	Mouse IgG2a, nonspecific, ascites fluid	
UPC10-5ml		5 ml	\$60.00
	Description:	Mouse IgG2a, nonspecific, ascites fluid	
FLOPC21-5ml		5 ml	\$60.00
	Description:	Mouse IgG3, nonspecific, ascites fluid	
MOPC104E-5ml		5 ml	\$60.00
	Description:	Mouse IgM, nonspecific, ascites fluid	
MOPC141-5ml		5 ml	\$60.00
	Description:	Mouse IgG2b, nonspecific, ascites fluid	
TEPC183-5ml		5 ml	\$60.00
	Description:	Mouse IgM, nonspecific, ascites fluid
