

Product Specifications

Product number:	<i>HIS-1000, HIS-1010</i>
Description:	<i>Whole Histones</i>
Amount:	<i>250 mg, 1 gram</i>
Physical state:	<i>White powder</i>
Manufacturing method:	<i>Purified from chicken red blood cells</i>
Storage conditions:	<i>Histones should be stored in a cool, dry place. Storage over a desiccator or under vacuum is preferable.</i>
Instructions for use:	<i>Histones are most soluble in an acidic buffer but can be dissolved in deionized water, depending on the needs of your assay system. Allow sufficient time for complete dissolution. The histone solution is best made immediately before use, but if storage of the solution is necessary, aliquot into single use amounts and freeze. Avoid repeated freeze/thaws.</i>
Warnings:	<i>For research or further manufacturing use only.</i>
